ANNEXTURE A:

Actual strategic performance and corrective measures that will be implemented

1. INTRODUCTIONS

Performance management is a process which measures the implementation of actions identified to achieve the organisation's strategy. It assists management to plan, monitor, measure and review performance indicators to ensure efficiency, effectiveness and the impact of service delivery by the municipality.

The constitution of SA (1996), section 152, dealing with the objectives of local government paves the way for performance management with the requirements for an "accountable government". The democratic values and principles in terms of section 195 (1) are also linked with the concept of performance management, with reference to the principles of inter alia:

- The promotion of efficient, economic and effective use of resources
- Accountable public administration
- To be transparent by providing information
- To be responsive to the needs of the community and
- To facilitate a culture of public service and accountability amongst staff

The municipal Systems Act(MSA), no. 32 of 2000, requires municipalities to establish a performance management system. Further, the MSA and the Municipal Finance Management Act (MFMA), no.56 of 2003, requires the Integrated Development Plan (IDP) to be aligned to the municipal budget and to be monitored for the performance of the budget against the IDP by using the Service Delivery and Budget Implementation Plan (SDBIP).

In addition, Regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations, 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and process of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the roles of the different role players". Performance management is not only relevant to the organisation as a whole but also to the individuals employed in the organisation as well as the external service providers and the Municipal Entities. This framework, inter alia, reflects the linkage between the IDP, Budget, SDBIP and individual and service provider performance.

2. LEGISLATIVE REQUIREMENTS

In terms of section 46(1)(a) of the MSA, a municipality must prepare for each financial year a performance report reflecting the municipality's and any service provider's performance during the financial year, including comparison with targets and with performance in the previous financial year. The report must, furthermore, indicate the development and service delivery priorities and the performance targets set by the municipality for the following financial year and measures that were or are to be taken to improve performance.

3. ADOPTION OF A PERFORMANCE MANAGEMENT FRAMEWORK

Performance management is prescribed by chapter 6 of the Municipal Systems Act, Act 32 of 2000 and the Municipal Planning and Performance Management Regulations, 796 of August 2001. Section 7(1) of the aforementioned relations states that " a Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and process of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the responsibilities of the different role players". This framework, inter alia, reflect the linkage between the IDP, Budget, SDBIP and individual service provider performance.

The municipality adopted a performance management policy framework in November 2008. The policy is in process to be revised based on the input received from the Audit committee and the municipal staff.

4. THE IDP and BUDGET

The IDP was revised and updated for 2013/14 and the budget for 2013/14 was approved by Council 29 May 2013. The municipality started with the process of aligning the IDP with the performance management requirements and has improved the alignment of the IDP /Budget & Adjusted SDBIP for the 2013/14 financial year.

5. THE SERVICE DELIVERY BUDGET IMPLEMENTATION PLAN

The organisational performance is evaluated by means of a performance reports (Top Layer SDBIP) at organisational level and through the service delivery and budget implement plan at directorate levels.

The SDBIP is a plan that converts the IDP and budget into measureable criteria on how, where and when the strategies, objectives and normal business process of the municipality is implemented. It also allocates responsibility to directorates to deliver the services in terms of the IDP and budget.

The MFMA Circular No.13 prescribes that:

- The IDP and budget must be aligned
- The budget must address the strategic priorities
- The SDBIP should indicate what the municipality is going to do during next 12 months and
- The SDBIP should form the basis for measuring the performance against goals set during the budget/ IDP processes.

The directorate (detailed SDBIP) captured the performance of each directorate. Unlike the municipal performance report, which reflects on the strategic performance of the municipality, the directorate SDBIP provided a comprehensive picture of the performance of that directorate/ sub- directorate. It was compiled by Director for their directorate and consisted objectives, indicators and targets derived from the approved Top Layer SDBIP, the approved budget and measurable service delivery indicators related to each functional area.

6. ORGANISATIONAL PERFORMANCE

The organisational performance was monitored and evaluated within financial year and the performance process can be summarised as follows:

- The Top Layer was approved by the Mayor on 26 June 2013 and Adjusted on 6 February 2014 the information was loaded on an electronic website.
- The actual monthly performance report against quarterly targets set, where discussed in the monthly Portfolio Committee meetings to determine early warning indicators and discuss corrective measures that were needed in cases of non-performance.
- The first quarterly report was submitted to Council and the second quarterly report formed part of the section 72 report in terms of the Municipal Finance Management Act, which was submitted to the Mayor on 25 January every year. The third quarter report was submitted to council.
- The quarterly SDBIP performance reports were also submitted to the Internal Auditor for verification and validation and to Audit Committee.

7. INDIVIDUAL PERFORMANCE MANAGEMENT

7.1 Municipal manager and managers directly accountable to the municipal manager

The Municipal Systems Act 2000 (Act 32 of 2000) prescribes that the municipality must enter into performance based agreements with the all section 57 employees and that performance agreements must be reviewed annually. This process and the format are further regulated by Regulation 805 (August 2006).

The appraisal of the actual performance in terms of the signed agreement must be done in the following manner two informal performance reviews and two formal reviews quarterly and annual performance evaluation. Only one informal performance appraisals review were done by the new Municipal Manager with all Directors in May 2013.

7.2 Other municipal personnel (post level)

The municipality initiated a process of implementing individual performance management to lower level staff and was planned to be phased in different phases on an annual basis. Performance agreements were not developed and internal resource capacity. An Automotive Performance Management System is being implemented and would be up cascaded up to all managers reporting to directors.

8. FINANCIAL MUNICIPAL PERFORMANCE FOR THE 2013/ 14 FINANCIAL YEAR AND MEASURES TAKEN TO IMPROVE PERFORMANCE

The financial performance will be included in the final performance report after financial statement had been finalised .

9. SERVICE DELIVERY KEY MUNICIPAL PERFORMANCE FOR 2012/13 FINANCIAL YEAR AND MEASURES TAKEN TO IMPROVE PERFORMANCE

9.1 STRATEGIC PERFORMANCE

Strategic performance indicates how well the municipality is meeting its objectives and which policies and processes are working. All government institutions must report on strategic performance to ensure that service delivery is efficient, effective and economical. Municipalities must develop strategic plans and allocate resources for the implementation. The implementation must be monitored on an on-going basis and the results must be reported on during the financial year to various role-players to enable them timeously implement corrective measures where required.

This report highlights the strategic performance in terms of the municipality's Top Layer Service Delivery Budget Implementation Plan (SDBIP), high level performance in terms of the National Key Performance Areas, performance on the National Key Performance Indicators prescribed in terms of section 43 of the Municipal Systems Act 2000 and an overall summary of performance on a functional level. Details regarding specific basic service delivery targets, achievements and challenges will be included is attached here as Annexure and will also be include in the Annual Report of the municipality.

The overall assessment of actual performance against targets set for the key performance indicators as documented in the SDBIP is illustrated in terms of the following assessment methodology:

COLOUR	CATEGORY	EXPLANATION
	KPI Not Met	Actual vs. target not achieved
	KPI Met	Actual vs. target 100% achieved

This table was used to monitor the implementation of the municipality's SDBIP.
