

WATER DISRUPTION NOTICE

Date: 10 October 2016

This notice serves to inform about the water disruptions that are due to maintenance to be done at Howiesonspoor rising main which is feeding Waainek Water Treatment Works on the Western side of Grahamstown.

BACKGROUND

The planned maintenance works involves repairing of the elevated tank at Waainek WTW, replacement of scour valves, installation of reducing valves and actual repairs to the mainline. This work is intended to ensure that the rising main does not fail while the municipality is preparing for the major refurbishment of rising main. The work will be conducted by Makana, Amatola Water and MBB teams.

The planned shutdown is scheduled on Thursday, 13th October 2016 and is expected to take the period of Eight (8) hours, starting from 07:00 AM to 15:00PM.

The municipality has reserved the storage of raw water supply from the two lei dams to supply during the downtime.

The residents are urged to use water sparingly during the execution of the works to minimize water disruptions.

We apologise for any inconveniences this may cause. The municipality is attending to water conservation & demand management matters to maintain uninterrupted water supply to all its residents.
