

# NCAME ROAD UPGRADE

Local contractors which have been appointed to implement Phase 2 of the Ncame road upgrade are making good progress. About 90 percent of the work has already been concluded on the section leading up to Makana Way and Extension 6.

Work is also progressing well and the road is currently closed to enable the workers to complete the outstanding work.

The workers have begun installing kerbs on the section between Extension 4 and Joza, however, the recent heavy rains have delayed the project.

The project is expected to be completed in January 2024. Some sections of the road will be closed as a result of the work that is being done. Motorists will be directed accordingly.
