OPERATIONAL GEAR AND UNIFORM DESCRIPTION AND REQUIREMENTS

In order to ensure the best possible protection for fire-fighters; the Makana Fire Services has adopted the NFPA 1975 standard on Station/Work Uniforms and the NFPA 1971 standard on Protective Ensembles for Structural Fire Fighting for the Fire & Emergency Services as best practice.

The adoption of the NFPA 1975 and 1971 Standard is in line with the intents of the Occupational Health & Safety Act, Act 85 of 1993 and this is considered non-negotiable in terms of achieving a standard of reasonable protection for the fire-fighter in terms of personal protection whether in bunker gear or not. Gear that requires NFPA certification or equivalent will be indicated.

It is expected that prospective suppliers must ensure that full account of adherence to the relevant SANS Textile Standards is maintained and proven upon request from Makana Fire Services.
